

# FACUL-TEA TIME

Meet your  
professors  
in an informal  
setting

Bring Your  
Own  
Mug/Cup  
(we'll provide some as well)

Coffee also available for those who need more caffeine

Monday | October 11

12:00 – 1:00 pm

Breezeway just outside the Bessey Hall Atrium

**Majoring in Biology or Genetics?**

**Don't know your instructors?**

This is a great way to get to know your professors in an informal setting.

Don't know what research they do..... *Ask*

Don't know what their hobbies are..... *Ask*

Don't know where they like to travel to..... *Ask*

This week's FACUL-TEA TIME host are: Drs. Corinna Most and Clark Coffman. Dr. Most studies the development of social behavior in wild olive baboons in Laikipia, Kenya. Dr. Coffman is a science education researcher and developmental geneticist.

Drs. Most and Coffman also coordinate the new experimental courses **BIOL/GEN113X and 114X**, which help 1<sup>st</sup> and 2<sup>nd</sup> year students explore and develop their interests within the fields of Biology and Genetics and beyond.

Come meet and chat with Professors Coffman and Most.

Biology

Sponsored by the Biology and Genetics Undergraduate Programs

103 Bessey Hall, Ames, IA 50011
