

October, 2021

HOWARD A. LEVINE

Distinguished Professor of Liberal Arts and Sciences 1999

Full Member of Graduate Faculty: 1979

Born: January 15, 1942 in St. Paul, Minnesota

Phone: 515-294-8142 (Office); 515-233-4884 (Home)

Fax: 515-294-5454

E-Mail: halevine@iastate.edu

Retired: June,31 2010

Education

B.A.	University of Minnesota, Duluth	1964	Chemistry, Mathematics
M.A.	Cornell University	1967	Mathematics
Ph.D.	Cornell University	1969	Mathematics

Honors and Awards

Outstanding Freshman Chemistry Award (Am. Chem. Soc.) 1960-61

Outstanding Freshman Mathematics Award 1960-61

Bachelor of Science Degree awarded Summa Cum Laude 1964

National Science Foundation Graduate Fellowship 1964 -1968

Sigma Xi Scientific Honorary Society 1983 -

Phi Kappa Phi Honorary Society 1985 -

Iowa State University Honors Program Teaching Recognition Award, 1998

Iowa State University Distinguished Professor of Liberal Arts and Sciences 1999 -

Listed in ISI Web of Knowledge among 250 most highly cited mathematicians from 2000-2010 (<http://highlycited.com/>)

Member, University of Minnesota, Duluth College of Science and Engineering Academy of Sciences, 2006 -

Elected Fellow of the American Association for the Advancement of Science (AAAS), 2015 - "For outstanding contributions to partial differential equations in singularity formation, modeling angiogenesis, novel dynamical systems approach to exponential enrichment, and invigorating applied mathematics at ISU" (2015 AAAS Citation)

Editorial Duties

Advisory (Associate) Editor, Mathematical Methods in the Applied Sciences(1990 -2001) (John Wiley and B. G. Teubner copublishors), then Managing Editor, (1/1/2002-12/31/2002)

Associate Editor, Journal of Mathematical Analysis and Applications (1995

- 2008)(Academic Press)
 Associate Editor, Applicable Analysis (2002 - 2008)(Taylor & Francis (formerly Gordon and Breach))
 Associate Editor, Mathematical Biosciences and Engineering (2002 -)(AMIS)
 Associate editor, Communications in Applied Analysis (1994 -)
 Member, editorial board, Cancer Informatics(2005 -) Libertas Academica Ltd

Professional Experience

Eidgenossische Technische Hochschule (Zurich), Akademischer Mitarbeiter
 Sept. 1968 - Aug. 1969
 University of Minnesota, Assistant Professor, 1969-73 (on leave 1971-73)
 Battelle Inst. (Geneva), Research Fellow, July-Dec. 1971; July-Dec. 1972
 Univ. of Dundee (Scotland), Symposium Participant, North British Symposium on Differential Equations, Jan.-June 1972
 SUNY, Binghamton, Visiting Assistant Professor, Jan.-June 1973
 Univ. of Rhode Island, Assistant Professor, 1973-75
 Associate Professor, 1975-78
 Iowa State University,
 Associate Professor, 1978-80
 Professor, 1980-99
 Distinguished Professor, 1999 -
 Departmental Executive Officer (Chairman), 1989-1992
 Phased Retirement , September, 2005 to May, 2010.

Faculty Improvement Leave (Sabbatical) Activities

- (1/1/83-5/31/83)
 Math. Sci. Res. Inst. (NSF-Berkeley) Member 1/1/83 - 3/31/83
 Istituto Analisi Globali (CNR-Univ. of Florence, Italy) 4/1/83 - 5/31/83
 (Travel and living expenses paid by both institutes)
- (1/1/95-5/15/95) but see note below.
 University of Dundee, Dundee, Scotland 6/12/94-7/13/94 and 7/26/94-8/26/94
 IMA (University of Minnesota) 10/3/94-12/16/94 and 2/7/95-4/7/95.
 Automoma University of Madrid, 1/5/95-1/19/95
 University of Paris South, 1/20/95-1/26/95
 Comenius University (Slovakia) 4/12/95-5/11/95
 University of Cologne 5/12/95-5/18/95/newline

Note: In addition to the FIL award, I received a teaching buy-out and subsistence award from the Institute for Mathematics and Its Applications at Minnesota in the amount of \$15,000 and spent a second semester at IMA. Moreover, I received a supplemental grant of \$5000 from the National Science Foundation for the foreign travel for this leave. All the foreign host institutions listed above paid my local expenses and

intra European travel expenses. I also received a supplemental international travel grant from the Science Research Council of Great Britain for my visit to Dundee.

3. (1/1/98-5/15/98)
Faculty Improvement Leave for Study in A second Discipline. I used this time to study with Alric Rothmayer (ISU) by helping him with a text he was writing on fluid dynamics and to visit Brian Sleeman (Leeds) to learn about angiogenesis in tumor growth. We put together a successful NSF application. The travel to and from Leeds was supported by our NATO grant.
4. (8/20/01-12/21/01)
Faculty Professional Development Assignment (Faculty Improvement Leave). I spent the semester as a participant in the mathematical biology program: From Individual to Collective Behavior at the Isaac Newton Institute of the University of Cambridge. I received stipend in lieu of local expenses for two months by the INI.
Note: In addition to the INI award, I was awarded an additional grant from the Engineering and Physical Science Research Council of Great Britain (Brian Sleeman was the P. I.) which provided travel and additional living expenses for two months.)
5. (8/20/01-12/21/01) Co-organized a workshop on angiogenesis at the Institute for Pure and Applied Mathematics, UCLA. Program on Cells and Materials: At the Interface between Mathematics, Biology and Engineering Workshop III: Angiogenesis, NeoVascularization and Morphogenesis, May 8 - 12, 2006 (Functioned as the chief local organizer.)

Professional Societies

American Mathematical Society
 Society for Mathematical Biology
 Society of Industrial and Applied Mathematics
 (President, Iowa Section, 1980 - 81)
 Visiting Lectures Program 1982 - 1985 (This program was turned over to the MAA in 1986)
 Mathematical Association of America Visiting Lecturer (1986 - present)

Research Interests

Partial differential equations and their applications.

Teaching

Year	Semester	Courses Taught
1978-79	Fall	M120 Calculus
	Winter	M121 Calculus
	Spring	M407 Numerical Analysis
1979-80	Fall	M521B Meth. Appl. Math.
	Winter	M522B Meth. Appl. Math.
	Spring	M523B Meth. Appl. Math.
1980-81	Fall	M121 Calculus
	Winter	M122 Calculus
	Spring	M523B Meth. Appl. Math.
1981-82	Fall	M426 Meth. Appl. Math.
	Spring	M527 Meth. Appl. Math.
	Summer	M165 Calculus
1982-83	Fall	M166 Calculus
	Spring	(Faculty Improvement Leave)
	Summer	M507 Num. Soln. of Ord. Diff. Equations
1983-84	Fall	M165 Calculus
	Spring	M265 Calculus
1984-85	Fall	M514 Real Analysis
	Spring	M515 Real Analysis
1985-86	Fall	M165 Calculus
	Spring	(Grant Funded Research)
1986-87	Fall	M481 Num. Sol. Dif. Eq.
	Spring	(Grant Funded Research)
1987-88	Fall	M585 Part. Diff. Eq.
	Spring	M586 Part. Diff. Eq.
1988-89	Fall	M507 Num. Soln. of ODE's
	Spring	M508 Num. Soln. of PDE's
1992-93	Fall	M266 Ord. Diff. Equns
	Spring	M473 Comp. Methods
1993-94	Fall	M151 Business Calc. (Lg. Lect.)
	Spring	M267 Ord. Diff. Equns.
1994-95	Fall	Faculty Improvement Leave
	Spring	Institute for Mathematics and its Applications teaching buyout

1995-96 Fall Spring	M166H Honors Calculus II. M166 Calculus II.	M515 Real Analysis I M516 Real Analysis II
1996-97 Fall Spring	M265H Honors Calculus III. M166H Honors Calculus II.	M557 Ordinary Differential Equations I M558 Ordinary Differential Equations II
1997-98 Fall Spring	M265H Honors Calculus III. Provost FIL	M465 Advanced Calculus (Study in a Second Discipline)
1998-99 Fall Spring	M166H Honors Calculus II. M520X Meth. of Appl. Math.	M519X Meth. of Appl. Math. Departmental release time
1999-00 Fall Spring	M165 Calculus I (Lg. Lect.). M166 Calculus II (Lg. Lect.).	M385 Intro to Partial Differential Equations. Departmental release time
2000-01 Fall Spring	M165H Honors Calculus I. M166H Honors Calculus II.	M385 Intro to Partial Differential Equations. Departmental release time
2001-02 Fall Spring	Faculty Improvement Leave M266 Ordinary Differential Equations	Math Methods buyout
2002-03 Fall Spring	M265H Honors Calculus III M516 Real Analysis	M515 Real Analysis
2003-04 Fall Spring	On leave Mathematical Biosciences Inst (OSU) (teaching buyout) Math 511, Complex Analysis	
2004-05 Fall Spring	Math 519 Methods of Applied Mathematics Math 520 Methods of Applied Mathematics	
2005-06 Fall Spring	Math 515 Real Analysis & Phased Retirement on leave at Institute for Pure and Applied Mathematic, UCLA	
2006-07 Fall Spring	Math 690P Topics in Mathematical Biology Math 690P Topics in Mathematical Biology (continued)& Phased Retirement	
2007-08 Fall Spring	Math 557 Ordinary Differential Equations Phased Retirement	
2008-09 Fall Spring	Math 515 Real Analysis Phased Retirement	

Chairman - co Major Professor with M. Nilsen-Hamilton (BBMB)

Post Doctoral/Other Fellows

Joanna Renclawowicz, PhD, University of Warsaw, Warsaw Poland, supported by a NATO post doctoral fellowship, 8/2002 - 6/2003.

Valentina Burmistrova, MS, supported by a Fulbright Fellowship, 8/2002 - 6/2003.

Ph.D. Committee or Thesis Supervisor

Gabia Lin (Math) (1978-81)

Luz Maria de Alba-Guerra (Math) (1980-84)

Alexander Ng (Physics) (1979-84)

Dwight Denny (Physics) (1982-84)

Teong Tan (Eng. Mech.) (1982-85)

Robert Sanderson (Chem. E.) (1982-86)

Chih-Ching Hsu (Chem. E.) (1982-84)

Steven Heron (Chem.) (1983-1988)

Richard A. Smith (Math.) (1984-85) (Ph.D.-1985)

Chairman/Major Professor

Dissertation: *Theoretical and numerical studies of some ill-posed problems in partial differential equations* (three papers).

First employment: Exxon Production Research Corp., Houston, TX

S. Park (Math.) (1985-89) (Ph.D.-1989)

Chairman - Major Professor

Dissertation: *The phenomenon of quenching in the presence of convection.* (one paper)

Returned to continue employment at Keimyung University in Korea.

Rvojia Lee (EE) (1986-88)

Jeffrey Anderson (Math) (1985-89) (Ph.D.-1989)

Chairman - Major Professor

Dissertation: *Qualitative studies of a convective porous medium equation with a nonlinear forcing term at the boundary* (two papers).

First employment: Ball State University, Muncie, IN

Deng Keng (Math) (1986-90) (Ph.D. -1990)

Chairman - Major Professor

Dissertation: *The asymptotic behavior of solutions of some nonlinear initial-boundary value problems of parabolic type.* (three papers)

First employment: Southwest Louisiana State U., Lafayette, LA

Bruce Reichard (Mech. E.) (1987-91)

K. Jayawardena (Math) (1988-92)

T. Maheswaran (Math) (1988- 92)

F. Hummer (Math) (1990-92)

Y. Uda (Math) (1989-93) (Ph.D. - 1993)

Chairman - Major Professor

Dissertation: *Some Fujita type results for systems of weakly coupled equations,*

- Serdal Pamuk (Math) (1997-2000) (Ph.D. -2000)
 Chairman - Major Professor
 Dissertation: *A mathematical model for tumor angiogenesis*
 First employment: Kocaeli University, Kocaeli, Turkey
- Mathew Halverson (Math) 2005-2008
 Chairman - Major Professor
 Dissertation: *Blow up and Collapse in Chemotaxis - How Much Diffusion is Enough?* First employment: Wartburg College
- Cory Howk (Math) (2006-2009)
 Chairman - co-Major Professor (with M.W. Smiley)
 Dissertation: *A Mathematical Model for Selective Differentiation of Neural Progenitor Cells on Micropatterned Polymer Substrates*
 First employment: Post Doctoral Fellow, University of Iowa Medical School (2010-2012), Now at East Carolina State University
- Yeonjung Seo (Math) (2007-2011)
 Chairman - co-Major Professor (with M. Nilsen-Hamilton)
 Dissertation: *A Mathematical Analysis of Multiple Target SELEX*
 First Employment: Visiting Assistant Professor, University of Pittsburgh

Curriculum Development/Honors Program/NSF-REU involvement

- Initiated course "Fluid Dynamics for Oceanographers" at URI 1974-75, repeated 1976-77.
 Reactivated 690P, Partial Differential Equations, ISU, Fall 1979-Spring 1980. (Now Math 585-586).
 Quadrupled enrollment in 521-523B from three students in 1979-80 to thirteen students in 1980-81. (Now Math 526-527.)
 Initiated Math 426 "Math Methods for Physical Scientists" (with K. Heimes, S. Willson). A service course for the physics department.
 Mentored two students in the Honors mentoring program, Spring, 2002.
 Introduced an experimental mathematical physiology course with R. Ackerman, Spring, 2002.
 Mentored David Pinkston, Honors project in angiogenesis, 2004-05
 Mentored students in NSF REU program, Summers 2004, 2005, 2006.

Publications

A. Refereed research articles, survey papers and conference proceedings.

1. Levine, H. A., *Convexity and Differential Inequalities in Hilbert Space*, Ph.D. Dissertation. Cornell University, Ithaca, New York (1969).
2. ———, *Logarithmic convexity and the Cauchy problem for some abstract second order differential inequalities*, J.D.E. **8** (1970), 34-55.
3. ———, *Logarithmic convexity, first order differential inequalities and some applications*, Trans. Am. Math. Soc. **152** (1970), 299-320.

4. ———, *On a theorem of Knops and Payne in dynamical linear thermo-elasticity*, Arch. Rat. Mech. Anal. **38** (1970), 290-307.
5. ———, *On the uniqueness of bounded solutions to $u'(t) = A(t)u(t)$ and $u''(t) = A(t)u(t)$ in Hilbert space*, SIAM J. on Analysis **4** (1973), 250-259.
6. ———, *Some uniqueness and growth theorems in the Cauchy problems for $Pu_{tt} + Mu_t + Nu = 0$ in Hilbert space*, Math Z. **126** (1972), 345-360.
7. ———, *Some nonexistence and instability theorems for solutions of formally parabolic equations of the form $Pu_t = -Au + F(u)$* , Arch. Rat. Mech. Anal. **51** (1973), 371-386.
8. ———, *Instability and nonexistence of global solutions of nonlinear wave equations of the form $Pu_{tt} = -Au + F(u)$* , Trans. Am. Math. Soc. **192** (1974), 1-21.
9. ———, *Some additional remarks on the nonexistence of global solutions of nonlinear wave equations*, SIAM J. on Analysis. **5** (1974), 138-146.

formation during the onset of tumor angiogenesis, Proceedings of the Fourth International Conference on Dynamical Systems and Diffusion Equations, Dynamical Systems and Differential Equations (A Supplemental Volume to the journal Discrete and Continuous Dynamical Systems) (W.Feng, S. Hu, X. Lu, eds.), 2003, pp. 817-826.

C. Chapters in Books

1. (With B. D. Sleeman), Modelling Tumour Induced Angiogenesis, Chapter 6, in: Cancer Modelling and Simulation, L. Preziosi, eds., Chapman and Hall/CRC Press, pp. 147-183 (2003).
2. (With M. Nilsen-Hamilton), Angiogenesis-A Biochemical/Mathematical Perspective, Chapter 2., in Tutorials in mathematical biosciences: Cell cycle, proliferation, and cancer (Vol. 3). A. Friedman,ed., Springer-Verlag, Berlin, Heidelberg, New York (2006).

D. Book Reviews

1. "Nonlinear Diffusion" (Fitzgibbon and Walker, eds.) Pitman 1977, Mathematics of Computation **32**(1978), 1323-1324.
2. "Solutions of Ill-Posed Problems", Tikhonof and Arisinen, Wiley (1977), Bull. Am. Math. Soc. (new series), **1**(1979), pp. 521-523.
3. "Partial Differential Equations; An Introduction to a General Theory of Linear Boundary Value Problems", A. Dezin, Spring-Verlag (1977), SIAM Review **30**(1988), 672-673.
4. "Operator Inequalities", Schröder, Academic Press (1980), Mathematics of Computation **37** (1981), 600-601.
5. "The Energy Method, Stability, and Nonlinear Convection", Straughan, Springer Applied Mathematical Sciences Series 1992, Bull Am. Math. Soc. (New Series) **27**(1992), pp.320-322.
6. "Blow-up in Quasilinear Parabolic Equations," Samarskii, Galaktionov, Kurdyumov and Mikhailov, De Gruyter Expositions in Mathematics, **19** (1995), SIAM Review **38**(1997), 692-694.
7. "Free Energy and Self Interacting Particles ", Suzuki, Birkhauser, Progress in Nonlinear Differential Equations and Their Applications, (2005), Bull. Am. Math. Soc. (New Series) **44**(1)(2007), 139-145.

C. Miscellaneous Publications

1. Letter to the Editor: Subject of the letter was an earlier article by Steven Zucker: "Teaching at the University Level," which appeared in the August, 1996 Notices. Notices of the American Mathematical Society, November 1996.
2. "Tribute to Lawrence E. Payne", Notices of the American Mathematical Society, May 2012, (With P. Schaefer, S. Levin.)
3. "Obituary for Lawrence E. Payne", Society of Industrial and Applied Mathematics News, May 2012, (With C. Bandle, F. Santosa and H. F. Weinberger.)

- 4 "Remembering James Serrin", Notices of the American Mathematical Society, June/July 2013, (With H. F. Weinberger, coeditor.)
- 4 "Hans Weinberger (1928-2017)", Notices of the American Mathematical Society, August 2018, (Editors: D. Aronson, P. Olver, F. Santosa.)

Research Grants

A. Research Grants and Summer Research Activities

1. As Coinvestigator

- (a) NSF (GP7041X) 1970, 1971, 1972, University of Minnesota (H. F. Weinberger, PI) (six summer months).
- (b) NSF (GP33031X), 1973, Cornell University (L. E. Payne, PI) (one month)
- (c) ONR (N0001482K0051), 1983, Cornell University (L. E. Payne, PI) (one month)
- (d) NIH-NIGMS (National Institute of General Medical Sciences) with Mallapragada (Chem-E), Nilsen-Hamilton (BBMB) PI, Smiley, Sakaguchi (Zoo-Gen), "Coupled Biological and Mathematical Models of Neuronal Pattern Formation investigating the biology of stem cell development", \$1.6M 7-04 to 6-08.
- (e) NIH Small Business Grant with Nilsen-Hamilton and George Krause, PI (Chemistry) , \$100,000 11/15/04-05 extended to "Aptamers for Imaging and Therapy", 9/1/06-8/31/10, Total funding including indirects: \$ 312,103, Purpose: To develop aptamers that promote drug efficacy, and aid in imaging.

2. As Principal Investigator

- (a) NSF(GP42777) 6/74 - 11/77, University of Rhode Island
- (b) NSF(MCS 78-02729) 7/78 - 12/79, University of Rhode Island (Amount of award under (a), (b), \$26,026) (eight summer months)
- (c) (i) AFOSR (84-0252) 8/30/84 - 9/30/87, Iowa State University, (Amount of award, \$242,130)
Coinvestigator: Paul Sacks
Other investigators: Tsu Fen Chen, Sat Nam Singh Khalsa, Michael Smiley, Roger Alexander
Research Assistants: Richard Smith, Thomas Evers, Jeffrey Anderson, John Axtell, Keng Deng, S. Park.
- (ii) AFOSR (88-0031) 10/1/87 - 4/15/89 (\$53,293)
Coinvestigators: Paul Sacks and Roger Alexander.

- (d) NSF (split funding with AFOSR) (DMS-8822788) 6/1/89 - 8/1/91, (\$ 55,000).
- (e) NSF (DMS-9102210) 9/15/91 – 9/15/93 Extended to 9/1/95 and supplemented by \$ 5,000. (Total Award \$ 53,800)
- (f) NATO (CRG.951209) (11/22/95-11/22/97) Travel grant (with B. D. Sleeman, (\$ 6263. Extended to 11/22/99 and supplemented by \$5098. (Total Award \$ 11,361.)
- (g) PI NSF (DMS-98-03992) 9/98-8/01, A grant to study and model malignant tumor growth. (Total Award, \$ 140,000

B. Other Summer Employment and Consultant Work

1. Mathematician, Naval Underwater Systems Center, Algorithmic Design Branch, New London, Connecticut. 5/13/77 - 8/31/78
2. Ames Laboratory, Chemical Engineering Division, Ames, Iowa. 6/1/80 - 7/31/80, Summer employee 6/1/81 - 7/31/81.
3. Lawrence Livermore National Laboratory, Magnetic Fusion Energy, Theory and Computations Group, Livermore, California. Summer employee 5/30/84 - 8/3/84, consultant 10/1/84 - 10/31/86.
4. University of Basel, Basel, Switzerland, visitor (6/1/87 - 6/30/87).
5. Univ. Heidelberg, Sonderforschungsbereich fur Mat., visitor 6/12/90 - 7/18/90.
6. Max Plank Institut fuer Matematik in der Naturwissenschaft, University of Leibzig, visitor 6/15/02 - 7/1/02.

Professional Service

1. Refereeing
I typically referee 2-3 NSF proposals and 10-20 journal submissions for 5-10 different journals per year.
2. Associate Editorships listed on page 1 of this vita.
3. Reviewer for faculty at other institutions
University of South Carolina
University of Tennessee
University of Glasgow
University of Cincinnati
University of Northern Illinois
University of Nebraska (2)
National Tsing Hua University, Hsinghu, Taiwan
University of Alabama, Huntsville (2)
University of Southwestern Louisiana
University of Notre Dame
Tulane University
University of Kuwait

University of Bath, England, UK
 Universidad del Pais Vasco, Bilbao, Spain
 Comenius University, Bratislava, Slovakia
 Koc University, Istanbul, Turkey
 University of Alberta
 Clair College, Cambridge University
 Georgia Tech University
 University of California, Davis, CA

4. Conference Organizing Committees
1. Workshop on Partial Differential Equations in honor of L. E. Payne
 Held at Cornell University, October 5-7, 1990. Supported by the
 Mathematical Sciences Institute of the United States Army.
 2. Workshop on Similarity Solutions of Differential Equations, April 14-
 16, 1991. Supported by Institute for Mathematics and its Applications
 and the National Science Foundation.

Invited Lectures (* Denotes honorarium or travel expenses received)

1971

- (*) A. University of Florence (Italy). “On the Uniqueness of Bounded Solutions
 to some Evolutionary Equations”, October 15, 1971.
- B. Battelle Advanced Studies Center, Geneva, Switzerland.
1. “On Uniqueness in the Cauchy Problem for $Pu_{tt} + Mu_t + Nu = 0$ in
 Hilbert Space”, August 12, 1971.
 2. ” “Mathematical Aspects of a Problem in Free Electrophoresis”, Sep-
 tember 15, 1971.
 3. “Uniqueness of Bounded Solutions of $u' = A(t)u$ and $u'' = A(t)u$ in
 Hilbert Space”, November 10, 1971.
- C. University of Minnesota. “Convexity, Concavity and the Porous Medium
 Equation”, January 26, 1971.
- (*) D. Forschungsinstitut for Mathematik, E.T.H., Zurich, Switzerland. “On the
 Growth of Solutions of Evolutionary Equations”, December 13, 1971.

1972

- A. University of Dundee, Scotland
1. “Convexity, Uniqueness and Stability for some Non-Well Posed Prob-
 lems in Partial Differential Equations: An Abstract Approach.” (Five
 lectures)
 2. “Some Mathematical Aspects of a Problem in Free Electrophoresis”,
 April 27, 1972.
 3. “Instability of Solutions of Nonlinear Hyperbolic Equations”, May 3,
 1972.
 4. “An Instability Theorem for Nonlinear Parabolic Equations”, May 24,
 1972.
 5. “An Instability Theorem for the Heat Equation with a Nonlinear
 Boundary Condition for the Porous Medium Equation, Backward in
 Time”, December 11, 1972.

- (*) B. University of Edinburgh, Scotland. “Uniqueness of Bounded Solutions to $u'(t) = A(t)u$ and $u''(t) = A(t)u$ in Hilbert space”, February 7, 1972.
- (*) C. University of Oxford, Oxford, England. “Instability of Solutions of Nonlinear Wave Equations,” March 3, 1972.
- (*) D. Heriot Watt University, Edinburgh, Scotland.
 1. Symposium on Logarithmic Convexity, “Logarithmic Convexity and Abstract Evolutionary Equations”, March 24, 1972.
 2. “An Instability Theory for the Heat Equation with a Nonlinear Boundary Condition and for the Porous Medium Equation, Backward in Time”, December 2, 1972.
- E. Battelle Advanced Studies Center, Geneva, Switzerland.
 1. “A Nonexistence Theorem for a Class of Mildly Nonlinear Parabolic Equations”, August 16, 1972.
 2. “Nonexistence and Growth Theorems for Mildly Nonlinear Wave Equations of the Form $Pu_{tt} = -A(t)u + F(u)$ ”, August 23, 1972.
 3. “Lower Bounds for Solutions of Hyperbolic Equations: The Method of Protter and Murray”, October 17, 1972.
- (*) F. Forschungsinstitute for Mathematik, E.T.H., Zurich, Switzerland.
 1. “Nonexistence and Instability Theorems in Nonlinear Problems”, July 23, 1972.
 2. “Nonexistence and Instability Theorems for Nonlinear Wave Equations”, July 31, 1972.
 3. “A Nonexistence Theorem for $u_t = u_{xx}$ with a Nonlinear Boundary Condition and for $u_t = (u^m)_{xx}$ Backward in Time”, August 7, 1972.
- (*) G. Ecole de Physique Theorique, University of Geneva, Switzerland. “Some Instability Theorems for Nonlinear Wave Equations”, October 20, 1972.
- (*) H. Ecole Polytechnique Federale, Lausanne, Switzerland. “Instability and Nonexistence of Global Solutions to Nonlinear Wave Equations of the Form $Pu_{tt} = -Au + F(u)$ ”, October 26, 1972.
- (*) I. University of Strathclyde, Glasgow, Scotland. “Some new Instability and Nonexistence Theorems for Nonlinear Wave Equations”, December 13, 1972.

Also invited to attend CBMS Regional Conference on Partial Differential Equations, May 22-26, 1973. (declined) (Texas Tech.).

1973

- A. University of Minnesota, Minneapolis, Minnesota. “Some Instability Theorems for Solutions of Nonlinear Wave Equations of the Form $Pu_{tt} = -Au + F(u)$ ”, January 4, 1973.
- (*) B. Cornell University, Ithaca, N.Y. “Instability and Nonexistence of Global Solutions to Nonlinear Wave Equations”, February 1, 1973.
- C. State University of New York at Binghamton, N.Y.
 1. “A Nonexistence Theorem for the Heat Equation with a Nonlinear Boundary Condition and for the Porous Medium Equation, Backward in Time”, February 9, 1973.
 2. “On the Growth of Solutions of Nonlinear Wave Equations in Hilbert Space”, March 16, 1973.
 3. “Uniqueness Theorems in Partial Differential Equations”, May 5, 1973.
- (*) D. University of Rhode Island, Kingston, Rhode Island. “Some new Nonexistence and Growth Theorems for Nonlinear Wave Equations”, March 14,

- 1973.

University service

1. Departmental

1. Screening Committee (1978-1981)
2. Graduate Committee (1981-82), (1983-86)
3. Colloquium Co-Chair (1982-86)
4. Organized P.D.E. Seminar (1979-85)
5. High Energy Physics Search Committee (1981-82)
6. Analysis Examination Committee (1983-85)
7. Applied Math Examination Committee (1987-88)
8. Numerical Analysis Examination Committee (1987-90)
9. PDE Search Committee Chair (1984-88)
10. Coordinating and Policy Committee (1987-89) (Chair, 1987-88)
11. Department Executive Officer Advisory Committee (1985-86), (1988-1989)
12. Individual Review Team for Associate Professors (1988-1989)
13. Coordinating and Policy Committee (1993-96) (Chair, 1993-94)
14. Applied Mathematics Search Committee (1995-96)
15. Individual Review Team for Associate Professors (1995-96)
16. Chair, Ad-hoc committee on research criteria and standards for faculty evaluation and promotion (Fall, 1996).
17. Individual Review Team member for Sunny Canic, (Fall, 1997)
18. Chair, Individual Review Team for Micheal Smiley, (Fall, 1997)
19. Coordinating and Policy Committee (1997-1998)
20. Represented the department at IMA chairman meeting, April, 1998.
21. Chair, Applied Mathematics Search Committee (1998-99)
22. Chair, Full Professor Review Comittee (1998-99).
23. Mentor for Xiaoming Wang (1998-99)
24. Applied Math Examination Committee (1998-99, Chair, 1999-2000)
25. Chair, Honors and Awards Committee (1999-2000)
26. Chair, DEO Review Committee (1999-2000)
27. Member, Advisory Committee (1999-2000)
28. Replacement Member, Advisory Committee (Spring, 2002)
29. Chair, Honors and Awards Committee (2004-2007)
30. Member, Assistant Professor Review Committee (2007-08)
31. Member, Individdual Review Team for K. Boushaba (Fall, 2008)

2. College

1. Honors and Awards (replaced K. Athreya, 1986-87)

2. Chair, DEO Search Committee (Spring, 1989)
3. Faculty Development Committee (2000-2003)
4. Chair, Computer Science DEO Search Committee, (2000-2001)
5. Chair, Internal DEO Search Committee for Mathematics, (2001)
6. Member, Distinguished Professor Nominating Committee (2002- 2003)

3. University

1. Physical Sciences Program Review Committee (1983-87)
2. Graduate Council (1984-86)
3. Graduate Cabinet (1985-87)
4. Vice President for Academic Affairs ad hoc Committee to review faculty grievance processes, (Dean Kelly, Chair), April 1985-April 1987.
5. Chair, DEO Search Committee for combined Aeronautical engineering/Engineering Science and Mechanics Departments. (1989-1990)

4. Other significant service not listed above

I initiated a long term program to build an active group in partial differential equations when I came to Iowa State University in 1978. The group has had as many as six faculty members although it currently has only five (Lieberman, Levine, Smiley, Sacks, Boushaba). All are actively engaged in research. The group has acquired an international reputation in this area as well as having attracted a considerable amount of outside funding for research. It formed the nexus for the successful formation of groups in numerical partial differential equations and in the control of partial differential equations.

Anne Steiner and I (during her tenure as DEO) convinced the University Administration that an institutional membership in the Institute for Mathematics and its Applications at the University of Minnesota would be in the long term best interests of the Mathematic Department and Iowa State University as a whole. We have been a participating institution since 1985. Since then, the University has received (in the form of grants, small and large, to our faculty) far more monies than it has spent on membership. At least one of our faculty members has had a post doctoral position at the IMA while several have obtained supplemental support for their Faculty Improvement Leaves from the IMA.

5. Department Executive Officer (July 1, 1989- June 30, 1992)

I have listed here some of the projects and activities that have taken up a good deal of my time beyond the ordinary duties of the DEO such as budget planning, ordinary personnel matters (promotion and tenure etc.).

1. (Fall 1989) Drafted a long range plan for the Department. Approved by the department (with modifications of a minor nature) by a vote of 33-3. Endorsed by the College.
2. Attended IMA Chairman's Meeting in Chicago (for K. Heimes) April, 1989 (IMA funded)
3. Attended Conference Board of Mathematical Sciences Chairman's Meeting, October, 1989 (Department and Provost's Office funded).

4. Attended IMA Chairman's Meeting in Chicago, April 22, 1990 (IMA funded)
5. Submitted a proposal for Graduate Assistance in Areas of National Need to the Department of Education, January, 1990. This proposal was not funded. There was 2.9M available and 147 proposals submitted. Only 19 were funded.
6. NSF Proposal submitted (Fall 1990) (also submitted to ONR,ARO) (A separate proposal was also sent to AFOSR.)
7. Added Carver 404 and Carver 196 to the Department's inventory of rooms (1990-91). Carver 404 is the J.L. Hinrichsen Faculty Common Room. Money for its refurbishing was donated by the Hinrichsen family. Carver 196 is the Mathematics Help Room. After several years of rather unsatisfactory solutions to the problem of the lack of a help room, we persuaded Facilities Planning and Management to dedicate a room in Carver for this purpose.
8. Increased office staff from 4 to 6 secretaries, one of whom monitors the reading room (1989-90).
9. Retained more departmentally generated funds in the department including obtaining complete departmental control over remedial math budget. We also control all grant buyout funds (Fall, 1989). Account converted to roll over type (Fall, 1991).
10. Reorganized front office for more efficient paper processing.
11. Increased the amount of computer equipment including the addition of 17 Project Vincent Workstations to the department's equipment base. (Later Vincent II brought this to 21 workstations.)
12. Added a full time professional computer hardware and software manager to the department's support staff (Fall, 1990).
13. Attended IMA Chairman's meeting April 21, 1991.
14. Added an Associate Chairman (Mike Smiley) to aid in more efficient scheduling. He also spent considerable time creating data bases for the Department.
15. Remodeled and redecorated faculty and departmental offices (1990-91).
16. The completion of the computerization of faculty offices was carried out.
17. (With Mathews) Submitted a proposal to the Department of Energy (through the Office of Minority Student Affairs) to fund to minority graduate fellowships in the MSM program. (1991-92).
18. Ad hoc committee to review the role and scope of teacher preparation classes in the LAS College (Appointed by the dean.) (1991-92).
19. GAANN proposal (Graduate Assistantships in Areas of National Need) prepared for submission to the U. S. Department of Education) (With E. Johnston). (Spring, 1992, Fall, 1992).
20. Reading Room report (with J. D. Smith) prepared for Parks Library (Spring, 1992). This report was prepared at the request of the Library in response to a suggestion from a University committee studying space that recommended the closing of remote reading rooms. The report was instrumental in preventing the closing of the room.
