

## **Ian N. Williams**

Agronomy Hall  
716 Farm House Ln  
Ames, IA 50011-1051  
inw@iastate.edu

### **Research Areas**

Atmospheric boundary layer, cloud and precipitation processes, surface water and energy exchanges, biosphere-atmosphere interactions, Earth system modeling, water and carbon cycles, climate sensitivity and feedbacks, climate and atmospheric dynamics.

### **Education**

- Ph.D. Geophysical Sciences, University of Chicago, Chicago, IL, 2012
- M.S. Atmospheric Science, Cornell University, Ithaca, NY, 2007  
Minor concentration: Environmental Fluid Mechanics and Hydrology
- B.S. Atmospheric Science, Cornell University, Ithaca, NY, 2005

### **Professional Experience**

- 2020- Assistant Professor, Geological and Atmospheric Sciences  
Iowa State University
- 2016-2020 Research Scientist, Lawrence Berkeley National Laboratory  
Climate and Ecosystem Sciences Division
- 2012-2016 Postdoctoral Scholar, Lawrence Berkeley National Laboratory  
Earth Sciences Division
- 2008-2011 Graduate Teaching Assistant, University of Chicago  
Department of Geophysical Sciences
- 2006-2007 Graduate Research Fellow, Cornell University  
Department of Earth and Atmospheric Sciences
- 2005 Science Undergraduate Laboratory Internship program  
Lawrence Berkeley National Laboratory
- 2004-2005 Meteorological Technician (Intern), National Weather Service, Kansas City, MO  
NOAA Central Region Climate Services

### **Fellowships**

- Cornell University Graduate School Fellowship (2006-2007)
- U.S. Department of Energy Science Undergraduate Laboratory Internship program (2005)

### **Awarded Grants**

- PI: “Land-Atmosphere Coupling and Convection in the Water Cycle”  
Department of Energy (SC/BER)  
Project Dates: 02/01/2018 - 02/01/2021  
Annual funding: \$665k/year
- Co-I: “Land Surface Forcing and Land-Atmosphere Interactions” (PI: Margaret S. Torn)  
Department of Energy (SC/BER)  
Project Dates: 2015 - 2017  
Annual funding: \$700k/year

### **Postdoctoral Advisees**

- Shaoyue Qiu (LBNL), Remote sensing of convective clouds and land-atmosphere interactions, 01/2019-present
- Yi Dai (LBNL), Modeling convective organization and cold-pools over land, 09/2019-present

### **Publications (under review)**

18. Dai, Y., **Williams, I.N.**, and Qiu, S. (under review), Simulating the effects of surface energy partitioning on convective organization: Case study and observations in the US Southern Great Plains, *J. Geophys. Res. Atmos.*

### **Publications (peer-reviewed)**

17. **Williams, I.N.**, Lee, J., Tadic, J, Zhang, Y. , Chu, H. (2020), Modeling spatial heterogeneity in surface turbulent heat flux in the US Southern Great Plains, *J. Geophys. Res. Atmos.*

16. Qiu, S., and **Williams, I.N.** (2020), Observational evidence of state-dependent positive and negative land-surface feedback on deep convection, *Geophysical Research Letters*.

### **Synergistic Activities**

- Session Co-Chair, Interactions Between Land Surface, Convective Boundary Layer, Clouds, and Aerosols: Linking Observations with Models, American Geophysical Union Fall Meeting, 2018.
- Member, GEWEX Local Land-Atmosphere Coupling (LoCo) Project Working Group.
- Member, Warm Boundary Layer Processes Working Group, DOE Atmospheric System Research (ASR) Program.
- California State University East Bay STEM Graduate Student Internship (participating scientist), 2018-present.

### **Institutional Service**

- DOE program-manager site visit at LBNL (2019), Berkeley, CA, February 20-22 (coordinator and presenter for LBNL's Atmospheric System Research program).
- 2019 DOE ASR PI Meeting, Rockville, MD (2019), June 10-13 (oral presentation as LBNL's representative).
- 2018 DOE ASR PI Meeting, Tysons, VA (2018), March 19-22 (oral presentation as LBNL's representative).
- LBNL Scientific Advisory Board, Climate and Ecosystem Science Division (2018), Berkeley, CA, October 2 (oral presentation).
- LBNL Earth and Environmental Sciences Area External Review (2017), Berkeley, CA, February 21-22 (oral presentation).
- LBNL DOE Scientific Focus Area (ASR) Review (2014), Gaithersburg, MD, April 9 (oral and poster presentations; panel discussion).
- Earth Sciences Division External Review (2014), Berkeley, CA, March 8-9 (oral presentation).

### **Invited Seminars and Plenary Talks**

- Toward combining observations and model experiments to improve soil moisture-precipitation feedback in Earth system models (2019) Joint ARM User Facility and ASR PI Meeting, Rockville, MD., June 12.
- Land-Atmosphere Coupling and Convection in the Water Cycle (2018), Argonne National Laboratory, Lemont, IL., August 23.
- Land-atmosphere interactions in Earth system models and observations (2016), Auburn University, Auburn, AL., April 28.
- Vegetation controls on surface heat flux partitioning, and land-atmosphere coupling (2015), American Geophysical Union, December 14-18, San Francisco, CA.

### **Other selected presentations**

Williams, I. N., Qiu, S., Dai, Y., Patricola, C.M., Influences of surface energy partitioning on convective initiation and organization: Observations and cloud-permitting model experiments (2019), American Geophysical Union, December 9-13, San Francisco, CA. (talk)

Williams, I.N., J. Lee, J. Tadic, H. Chu, S. Biraud Y., Zhang (2019), Characterizing vegetation spatial heterogeneity for cloud-resolving hindcasts in the SGP, 2019 Joint ARM User Facility and ASR PI Meeting, June 10, Rockville, MD. (Breakout Session talk)

Williams, I.N., Evaluating Soil Moisture Feedback on Convective Triggering: Roles of Convective and Land-model Parameterizations (2018), American Geophysical Union, December, Washington DC. (poster)

Williams, I.N., M.S. Torn, W.J. Riley, M.F. Wehner, and W. Collins (2013), Climate extremes and ecosystem productivity in global warming simulations, American Geophysical Union, December 9-12, San Francisco, CA. (talk)

Williams, I.N., Y. Lu, J.E. Bagley, L.M. Kueppers, S.C. Biraud, and M.S. Torn (2016), Land-atmosphere coupling and climate prediction over the U.S. Southern Great Plains, American Meteorological Society, June 20, Salt Lake City, UT. (talk)

Williams, I.N., W.J. Riley, L.M. Kueppers, M.S. Torn, and S.C. Biraud (2016), Separating the effects of phenology and diffuse radiation on gross primary productivity in winter wheat, American Meteorological Society, June 21, Salt Lake City, UT. (talk)

Williams, I.N., and M.S. Torn (2016), Land-atmosphere coupling and climate prediction over the U.S. Southern Great Plains, Atmospheric System Research Science Team Meeting, May 2-5, Vienna, VA. (poster)

Williams, I.N., and M.S. Torn (2015), Surface turbulent heat flux partitioning and warm-season boundary layer clouds, Atmospheric System Research Science Team Meeting, March 16-20, Vienna, VA. (poster)

Williams, I.N., and M.S. Torn (2014), The roles of soil moisture and vegetation in surface turbulent flux partitioning, Atmospheric System Research Fall Working Group Meeting, November 20, Bethesda, MD. (talk)

Williams, I.N. (2014), Coupled carbon-water cycles and the influence of land surface processes on climate prediction, Lawrence Berkeley National Laboratory ASR Scientific Focus Area Review, April 9, Gaithersburg, MD. (talk)

Williams, I.N. (2014), Atmospheric carbon in the Southern Great Plains: Diagnosis, attribution, and prediction, Lawrence Berkeley National Laboratory ASR Scientific Focus Area Review, April 9, Gaithersburg, MD. (poster)

Williams, I.N. (2014), Using atmospheric measurements to advance a predictive understanding of the coupled carbon-climate system (2014), Lawrence Berkeley National Laboratory Earth

Sciences Division Review, March 8-9, Berkeley, CA. (talk)

Williams, I.N., M.S. Torn, W.J. Riley, M.F. Wehner, and W. Collins (2013), Climate extremes and ecosystem productivity in global warming simulations, American Geophysical Union, December 9-12, San Francisco, CA. (talk)

Williams, I.N., M.S. Torn, and W.J. Riley (2013), Clouds, aerosols, and the water and carbon cycles over the Southern Great Plains, Atmospheric System Research Science Team Meeting, March 18- 21, Potomac, MD. (poster)

Williams, I.N., W.J. Riley, M.S. Torn, S.C. Biraud, M.L. Fischer, and J.A. Berry (2012), A Stochastic method to evaluate carbon cycle and atmospheric transport models using atmospheric observations, Third Atmospheric System Research Science Team Meeting, March 12-16, Arlington, VA. (poster)

Williams, I.N., W.J. Riley, M.S. Torn, J.A. Berry, and S.C. Biraud (2011), Challenges in constraining surface trace gas exchanges from observations, American Geophysical Union, December 5-9, San Francisco, CA. (talk)

Williams, I.N., S.J. Colucci (2009), Characteristics of baroclinic wave packets over the North Atlantic during strong and weak polar vortex events, American Meteorological Society, June 9, Stowe, VT. (talk)
